

IETA COMPETITION POLICY AND CHATHAM HOUSE RULE

It is IETA's policy to comply fully with all applicable laws, including competition and antitrust laws. IETA has developed a Competition Policy to govern the conduct of participants both at formal meetings and in informal discussions that take place at events before or after formal meetings.

In particular participants should not discuss or agree confidential information about:

- matters relating to their pricing practices;
- plans to expand or reduce output;
- arrangements relating to specific customers; or
- any other matter on which participants compete in the marketplace.

Infringement of competition law may bring with it serious consequences for you as an individual, the companies you represent and IETA itself. If the chair considers that discussions might be construed as being sensitive from a competition law perspective, the chair will bring an end to that topic of discussion. Meeting participants should likewise not hesitate to voice any concerns they may have. Participants should also familiarise themselves with IETA's Competition Policy and the Guidelines in the Do's and Don't's document.

CURRENT NDCs AND ARTICLE 6 → What about Updated NDCs (to 2035)?

80% of countries intend to use international market mechanisms or broad international support to meet their NDCs or increase ambition

Over 20% of countries actively engaged in at least one cooperative approach through bilateral agreements, MOUs or participation in pilot projects.

- Countries that signalled their intention to use international market mechanisms or broad international support to meet their NDCs or increase ambition.
- Countries actively engaged in at least one cooperative approach through bilateral agreements, MOUs or participation in pilot projects.
- Does not mention or without information

IETA ARTICLE 6 – LETTER OF AUTHORIZATION (LOA) TRACKER

Objective:

- To provide a standardised overview of LoAs that have been issued, and the corresponding article 6 aligned projects.
- To maintain an up-to-date directory of LoAs, as well as links to publicly available LoAs.

Feedback:

- Which columns do you think are useful/not useful? What other features of existing LoAs should we highlight? Are there inaccuracies you would like to bring to our attention?
